## THE RELATION BETWEEN
CYBRAL STORM™ & CYBRAL GUARD™

STORM and GUARD collaborate to identify critical assets and assess their sensitivity levels, enhancing overall asset protection.

In the fight against malware, STORM's detection of asset misconfigurations aids GUARD in scanning for and mitigating potential threats, while GUARD's Malware AI module shares malicious code findings with STORM for targeted attack path adjustments.

CYBRAL

Continuous monitoring and AI-powered security provide a 360° view of your security posture. Find and protect sensitive data without human intervention.

Automatically and continuously identify all threats, vulnerabilities, and attack paths that offenders can use.

Automated
CyberSecurity Driven By
Artificial Intelligence

CYBRAL™ GUARD

GUARD YOUR ASSETS, SECURE YOUR DATA AND STAY COMPLIANT.

The latest advances in AI, NLP, and Large Language Models are put in place to monitor your assets, discover sensitive regulated information, classify it, and protect it, Safeguarding your most valuable assets.
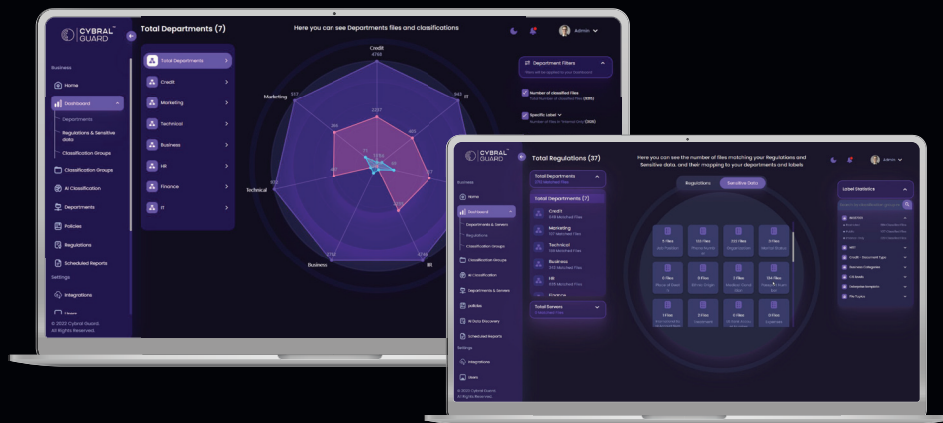

UNIQUE CAPABILITIES

 Regulations compliance with AI

 Data protection

 Cloud & On-premise

 Standard and Custom classification with AI

 Covers unstructured, semi-structured and structured data formats

GUARD™ offers a comprehensive solution to help comply with privacy and security standards, automatically classifying your data to mitigate the risks of data breaches, penalties, and reputational harm.

Available in both on-premise and SaaS options, It ensures organizations can monitor regulated data and maintain compliance seamlessly. GUARD`s AI technology learns from your data on your premise, providing a personalized and secure approach to data protection.

CYBRAL™ STORM

UNLEASH THE STORM OF PROTECTION AND ENHANCE YOUR SECURITY POSTURE

STORM Analyzer

is responsible for scanning the external/internal infrastructure, and the generation and **analysis of attack paths** without the need of actual **exploitation.**
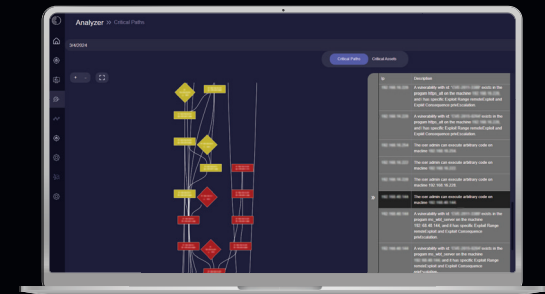

Visualizing all possible ways in which the network can be breached, provides actionable insights for proactive defense strategies and recommendations. Analyzer's AI-driven capabilities empower organizations to understand their security posture and mitigate security risks effectively and efficiently.
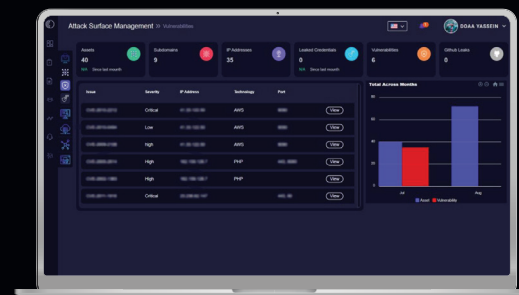

STORM Scanner

is designed to continuously update an **Attack Surface Map**, showing all assets of the company (domains, subdomains, IP addresses, OS, Web, SW, and cloud assets).

SCANNER'S AI Identifies, ranks, classifies, and prioritizes vulnerabilities, based on their severity, impact, and exploitability. This allows organizations to proactively address security weaknesses and focus on the most critical cyber threats.

CORE CAPABILITIES

 Full external and internal visibility on the attack surface

 Attack Graph Analysis

 Prioritized Critical Paths with RL

 AI-driven risk assessment and prioritized remediations.
